Security Assessment

- Fastcom ensures its customers to be protected against any kind of illegal attacks
- Fastcom security assessments include
 - Network Security Assessment
 - Assess an IP (Internet Protocol) network from outside
 - Penetration Test
 - Assess the network following an “ethical hacking” methodology developed in-house
 - Application Security Assessment
 - Analysis of an application developed in-house or in trusted third-party company to detect security weaknesses

Security Assessment

Fastcom is able to assist you in assessing the weaknesses of the security of your infrastructure and of your solutions
