

## With [SMACS](#) solutions from [FASTCOM](#), [e-shelter security GmbH](#) achieves its goals of highly secure data centers

- [e-shelter security GmbH](#) secures critical infrastructures.
- People flows and material flows are automatically secured by the [SMACS solutions](#) of [FASTCOM](#) and thus meet the highest security standards.
- [SMACS](#) solutions implement security while allowing for flexibility at the same time.

Lausanne, Switzerland – July 8, 2020

[FASTCOM Technology SA](#) secures critical infrastructures with [e-shelter security GmbH](#).

**The Customer:** e-shelter security GmbH has been protecting critical infrastructures for over 15 years and offers its customers integrated overall solutions that combine physical security, cybersecurity and digitalization. The range of services of e-shelter security includes advice, planning, construction and commissioning of security systems.

**The Challenge:** The security concepts for critical infrastructures have to meet the highest standards while securing all flows of people and materials. Access must be quick and convenient for authorized employees, customers and visitors, but impossible for unauthorized persons. Luggage and material transport must be possible both separately and in combination with simultaneous access of people. Standardized, flexible security processes should target critical infrastructures such as data centers and reliably secure the operations.

**The Solution:** In order to optimally secure the flows of people and material, [SMACS Flex](#) and [SMACS Mat](#) are implemented. This enables to secure people and material flows in two- or multi-door airlocks without major construction efforts to the existing infrastructure. Disabled people are seamlessly integrated. SMACS can handle airlock sized up to more than 15m<sup>2</sup>. Special modes (cleaning mode, VIP mode, emergency exit mode, etc.) are available.

*"With SMACS Flex and SMACS Mat from FASTCOM, we can, for the zones with critical infrastructures, secure and flexibly adapt the various flows of people and materials. SMACS airlocks allow us achieving our security goals in line with the requirements."*

**Dr. Tristan Haage, CEO of e-shelter security GmbH**

[FASTCOM](#) is a leading company in providing solutions against tailgating. Based in Switzerland, FASTCOM is an independent company and is active worldwide for more than 15 years. For more information, please visit [www.fastcom-technology.com](http://www.fastcom-technology.com).
