

FASTCOM Technology SA present the SMACS solutions for multi-flow, high-performance and flexible anti-tailgating at the **SECURITY 2016, Essen, Germany**

- The SMACS product line are integrated solutions for high performance and flexible **anti-tailgating**.
- Multiple types of flows may be controlled simultaneously.
- Typical applications are data centers, secure production zones, command & control rooms, research & development laboratories, airports and elevators
- The SMACS can be easily interfaced with any access control solution.
- Worldwide customer references.

ESSEN, SECURITY 2016, Hall 3 / Stand C68, from September 27th to 30th 2016

FASTCOM Technology SA, a leading company in intelligent anti-tailgating solutions, presents its SMACS product line at SECURITY 2016. For more than 15 years, the SMACS solutions have been preventing tailgating and piggybacking in numerous domains worldwide. Typical applications are data centers, finance, secure production zones and airports. Every day, leading companies are using SMACS to preserve their security.

The SMACS product line is a complete portfolio of anti-tailgating solutions that can manage simultaneously different types of flows such as people and material.

Functionalities such anti-tailgating, vacuity check and user guidance can be aligned to the business processes of the customer. Similarly, the access modes can be aligned on specific needs. Typical examples are asymmetrical entry processes and the implementation of the "4 eyes" principle.

The SMACS can be implemented in existing infrastructure without major construction work. Any room may be transformed into a high-security airlock. The SMACS can be easily interfaced with any access control solution and are able to perform the door management.

"With the SMACS solution, we satisfy our customers' needs into anti-tailgating security and help them to implement efficient multi-flow security integrated into a single infrastructure."

Dr. Fabrice Moscheni, CEO, FASTCOM Technology SA
